

Launch Event: Distribution Grid Operation Toolbox for Practitioners

The objective of the Distribution System Operation Toolbox for Practitioners is to be a **repository for state-of-the-art knowledge and resources** that contributes to **increasing the capacity of grid operators** to manage distribution grids efficiently and sustainably. The Toolbox collates and makes available a **library of relevant resources**, such as studies, scientific articles, guidelines and other relevant files, allowing the end-user to easily find, add and delete files through a **user-friendly interface**.

Content of the launch event:

- Demonstration of the Distribution Grid Operation Toolbox and its applications.
- Outline of applications of the “toolbox method” for other technical topics.
