

THE “SE4JOBS” PROJECT

Promoting Employment through
Renewable Energies and Energy Efficiency
in MENA (RE-ACTIVATE)

Head of project: Steffen Erdle (GIZ)
SE4JOBS Training Workshop, Cairo, 26.-27.10.2015

What is the Challenge?

- How can you **achieve sustainable energy policy goals** while at the same time **creating domestic value and employment**?
- How can you ensure that there is a **coherent policy planning and engage relevant stakeholders** in order to achieve RE/EE goals and socio-economic benefits?
- ILO: 8,4 million jobs in renewable energies until 2030 – **what approach and solution** can a country take in order to get a „big share of jobs and value“ of it?

RE-Activate/SE4JOBS: Launched in the 2nd half of 2014 by 6 GIZ Projects, experts and other partners interested in the linkages between sustainable energy and socio-economic development

SE4JOBS

Toolbox

SE4JOBS Toolbox helps us...

- ...to understand the **nexus** between **RE/EE deployment** and **local socio-economic development**
- ...to learn about **good practices** and success cases from selected emerging and developing countries
- ...to identify key **success factors** and policy questions for successful assessment, planning and implementation
- ...to contribute to **international discussion** and debates

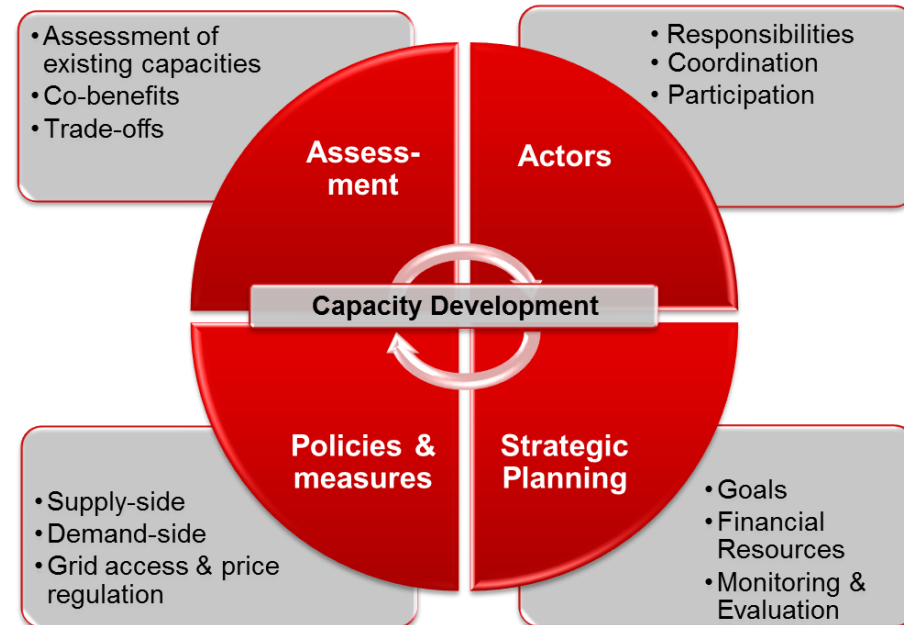

SE4JOBS Toolbox – Objectives

...will not give you a “blueprint” but it supports policy-making processes and raises key questions related to:

- A) Capacity Assessment
- B) Coherent policy planning
- C) Coord./ Eng. Actors
- D) Smart policies and measures

User: Regional and national policy planners, expert, consultants and GIZ

History of SE4JOBS Toolbox promotion

- SE4JOBS Kick-off Workshop in Eschborn on 13.10.2014
- 1st SE4JOBS Expert Workshop in Rabat on 25.03.2015
- 2nd SE4JOBS Expert Workshop in Tunis on 09.06.2015
- Presentation of the first toolkit version at the GIZ Global Sector Meeting in 15.04. 2015 and at the Beirut Energy Forum on 10.09.2015
- **3rd SE4JOBS First Application of SE4JOBS Toolbox Training Workshop in Cairo in October 2015**
- Presentation of the final toolkit version at the COP 21 in Paris in Nov. 2015 and at the World Future Energy Summit Abu Dhabi in Jan. 2016

Objective and focus of Today's Training Workshop

- **Introduction** to the Toolbox: aim, structure and content (modules, one key issue per module)
- **Application of the toolbox and selected tools**
- **Learn about options from good practices** of other countries
- **Collection of insights and recommendations** from the Egyptian context
- **Getting to know other stakeholders**

Capacities for RE and the needs for capacity building for RE in Egypt will be the guiding theme for the workshop

Thank you for your attention and a fruitful training
workshop for all of us!
