Wiki articles

How is a wiki organized?

What is a good article?

- **Links to other pages and other pages link to it**
an article will have few readers if it is not linked properly
- **Is categorized**
so that readers who are interested the topic dealt with in your article will also find it
- **Precise title**
most users find an article via the title search
- **Short and precise**
divide long articles into several ones and link them
- **Contains pictures / tables / graphs**
text pages do not attract the attention of readers

Create a new article

1. To create a new article enter the preferred title in the search panel and confirm with Go.

A screenshot of a search panel. It features a search input field containing the text 'energy sources', which is highlighted with a red rectangular box. To the right of the input field are two buttons: 'Title' and 'Full text'.

2. If it does not exist yet, click "Create the page".

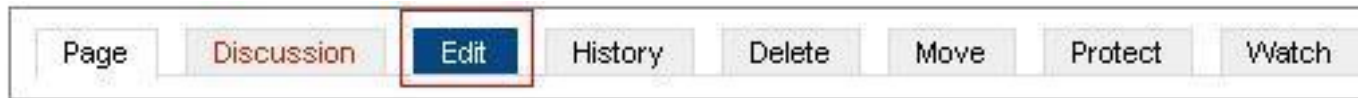

A screenshot of search results. At the top, it says 'Search results'. Below that is a search input field containing 'energy sources' and a 'Full text' button. Underneath is a navigation bar with links for 'Content pages', 'Multimedia', 'Help and Project pages', 'Discussions', and 'Eve'. At the bottom, a red-bordered box contains the text 'Create the page "Energy sources" on this wiki!'. The text 'Energy sources' is highlighted in red.

3. The editor of your new article will open. Enter your text and be sure to click the safe button when finished.

Editing an article

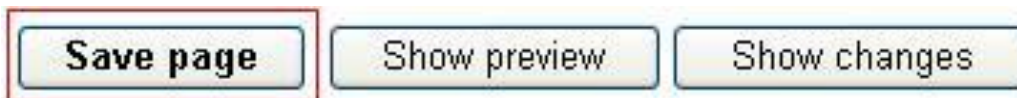

1. Open the article you want to edit
2. Click at the edit tab to open the text editor

3. A toolbar is shown above the text

4. Edit the article
5. Save your changes by clicking on Save button

Linking articles

- Wikis provide the opportunity to link a word in your current article with any other existing wiki article. Usually the word(s) you link match the linked article 's title.
 - **Note:** To link a word with another article be sure this article really exists. If it does not exist the link will be displayed red. This is also a way to create a new article.
1. Click at the edit tab to open the text editor

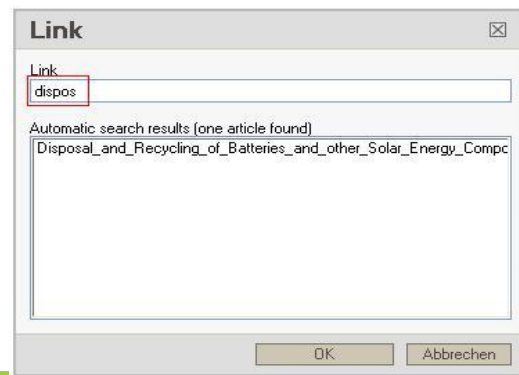

Linking articles

2. Highlight the word(s) that will build the link later and click the Edit/Insert Link symbol in the toolbar.

l from the Sun.
her passive solar or active solar depending
the use of photovoltaic modules (also called
) to convert sunlight into useful outputs. Pas
able thermal mass or light dispersing prope

3. A dialog window appears. Search for an existing article by typing its title into the panel "Link". Click on the article you want to link to and confirm with OK.

Linking articles

4. All links are displayed in blue and underlined in the editor.
5. Make sure to save your changes by clicking Save page at the bottom of the page.
6. In the article- view successfully linked words are displayed in blue. Links with no existing target are displayed in red.

Categorizing an article

- All pages should be categorized!
- This Wiki allows you to categorize pages by adding one or more category tags to the text. Adding these tags create links at the bottom of the article which take you to the list of all pages in that category, which makes it easy to browse related articles.

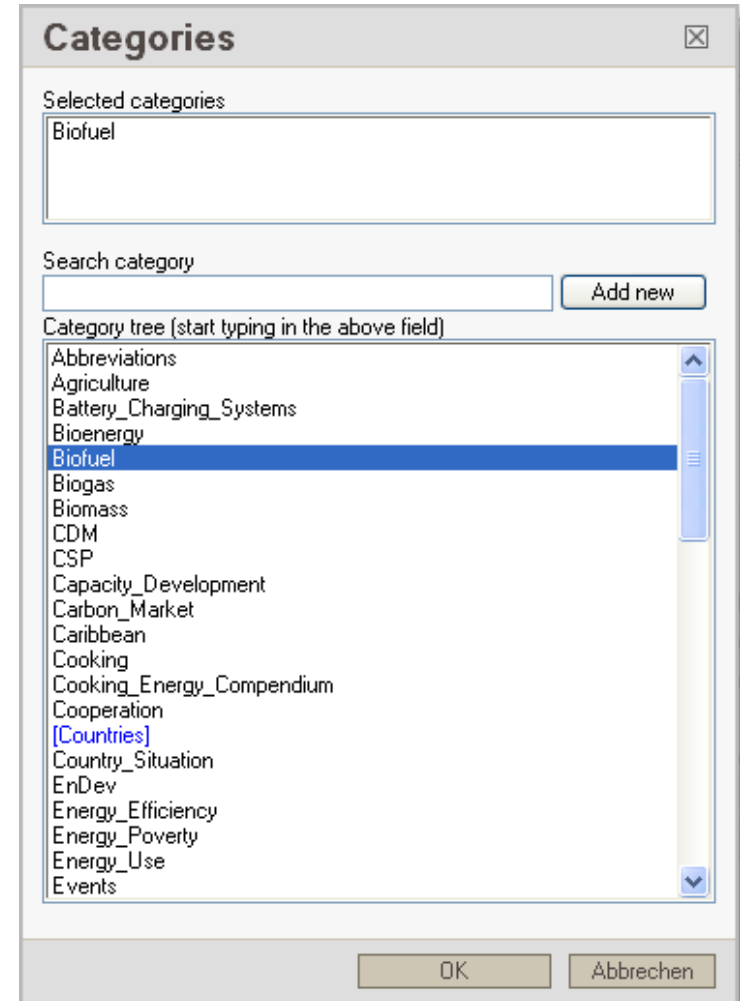

1. Click at the edit tab to open the text editor
2. Click on “Categories” in the toolbar.

Categorizing articles

3. A new window opens where you can select one or more categories from the provided list by double-click.
4. After selecting, the categories are shown in the upper part of the window. Accept the changes by pressing OK
5. Save the article.

Insert a picture

1. Mark the line where the file shall appear. Click the symbol Insert/Edit Image in the upper toolbar.

2. Enter the file's name or its first few letters into the search box and choose the correct one from the list.

3. Confirm with OK. The graph will appear in the text.
