

POWERING AGRICULTURE:

AN ENERGY GRAND CHALLENGE
FOR DEVELOPMENT

YOUR CLEAN ENERGY INNOVATION, HELPING TO FEED THE WORLD & INCREASE FOOD SECURITY

A small thing like access to clean energy can transform the lives of farmers, helping them grow more food in less time, and ensuring their families, communities and countries have enough to eat now and tomorrow.

USAID and its partners have come together to form the Powering Agriculture: An Energy Grand Challenge for Development, which offers funding for market-based clean energy solutions for farmers and agribusinesses.

JOIN THE FIGHT AGAINST HUNGER:
OFFER FARMERS YOUR CLEAN ENERGY SOLUTIONS
